INDEX OF ABSTRACTS

Volume 3 (1974)

ADHVARYU, Dhiresh. A note on some unbiased estimators, 74t-21; Product method of estimation in sampling with unequal probabilities (preliminary report), 74t-23; Successive sampling for a class of estimators, 74t-24; Systematic sampling for a class of estimators, 74t-22.

AHMAD, Ibrahim A. and LIN, Pi-Erh. On the nonparametric estimation of failure rate function (preliminary report), 74t-67.

AHSANULLAH, M. A characterization of exponential distribution, 74t-55.

AHUJA, J. C. and ENNEKING, E. A. On estimating a parameter of the logarithmic series distribution, 144-38.

ALBERT, Arthur. Orthogonal designs and the mixed model, III, 73t-90.

ANDERSON, D. A. and FEDERER, W. T. Possible absolute determinant values for square (0,1) matrices useful in fractional replication, 142-27; Representation of main effect plans for the general asymmetric factorial in terms of (0,1) matrices, 142-28.

ANDERSON, D. A. and THOMAS, A. M. A generalization of the foldover design, 74t-5.

ANDERSON, Donald A. and CARNEY, Edward J. Ridge regression estimates of canonical variables, 143-26.

ANDERSON, Peter O. A lower confidence bound for the difference between the largest and second largest means of k normal populations, 74t-68.

ARCHAMBAULT, William A. T., Jr. and MIKULSKI, Piotr W. Pitman ARE of the Cramér-Von Mises test, 142-4.

AROIAN, Leo A. Moments of the decisive sample number in sequential tests, 144-1 and 74t-44.

ARORA, Manmohan Singh, A proposal to replace (partially) the Pearson system of frequency curves by the 4-parameter generalized Weibull system, 144-36.

BANERJEE, Asit K. A Bayesian study of the inverse Gaussian distribution (preliminary report) 74t-15.

BANERJEE, Asit K. and BHATTACHARYYA, G. K. Testing hypotheses in a two state semi-Markov process 143-14.

BARTOSZYŃSKI, R. and GOVINDARAJULU, Z. The secretary problem with interview cost. 74t-58.

BASAWA, I. V. On the asymptotic efficiency of the maximum likelihood estimate of a parameter in a stochastic process, 74t-13.

BASU, Asit P. and GUPTA, A. K. Classification rules for exponential populations: two-parameter case (preliminary report), 141-103.

BAYNE, C. K., MANSON, A. R. and MONROE, R. J. Protecting main effect models against two-factor interaction bias in fractions of 2^r factorial designs, 142-32.

BERNARDO, José-Miguel. Information theory and Bayesian design of experiments, 145-4.

BHARGAVA, N. K. and TIKKIWAL, B. D. On minimum variance unbiased linear estimation in T-classes, 74t-38.

BHATTACHARJEE, Manish C. Tail behaviour of failure distributions with monotone and other failure rates, 144-12.

BHATTACHARYYA, G. K. See BANERJEE, A. K.

BLACHMAN, Nelson M. A Chernoff bound for the spectrum of an FM signal, 74t-35.

BLOCK, Henry W. Constant multivariate hazard rate and continuous multivariate exponential extensions, 74t-48.

BLUMENTHAL, Saul and GOVINDARAJULU, Z. Robustness of Stein's two-sample test under mixtures (preliminary report), 142-24.

BRAUN, H. I. Weak convergence of multiparameter empirical processes, 74t-31; Weak convergence of sequential linear rank statistics, 74t-12.

BROWN, Kenneth G. Asymptotically efficient estimation of variances with linear structures suing MIVQUE, 142-11.

CAHOON, Lawrence S. and HINICH, Melvin J. Multidimensional scaling technique for locating targets using distance only, 144-14.

CAPRIHAN, A. and SRIVASTAVA, J. N. Some new properties of Srivastava codes, 143-3.

CARNEY, Edward J. See ANDERSON, Donald A.

CARROLL, Raymond J. Asymptotically nonparametric sequential procedures for the K-sample ranking problem (preliminary report), 73t-94.

CHANDA, Kamal C. Asymptotic properties of order statistics attracted to normal law, 144-18.

CHANG, Ing-Jye and HUANG, Wen-Tao. Fixed length interval estimations of the largest mean of k normal populations with unknown variances, 144-34; Fixed-width multi-stage interval estimations of the largest mean of k normal populations with unknown variances, 144-51.

CHANG, Tai-San and HUANG, Wen-Tao. Some selection procedures for parameters of k exponential populations, 74t-65; Some selection procedures for the scale parameters and location parameters of k exponential populations, 74t-43.

CHEN, Robert. A note on finitely additive strong laws, 74t-2.

CHENG, Smiley W. The unified method for finding the optimum spacing of the ABLE and its application to various distributions, 144-37.

CLEVENSON, M. Lawrence and ZIDEK, James V. Simultaneous estimation of the means of independent Poisson laws, 144-2.

CLICKNER, Robert P. and SETHURAMAN, J. Excessive deviations of k-sample linear rank statistics, 142-12.
